

## DANGER !

Birds and other animals can cause severe damage to airplanes. Feeding animals at the airport encourages them to live at or return regularly to the airport. This may put both animals and aircraft passengers at risk.

### Things you can do to help:

- Do not feed birds or other animals
- Pick up food and wrappers after eating outside
- Place lids securely on garbage cans
- Report trash piles or wildlife activity to Wildlife Management personnel at **602-XXX-XXXX** or log onto [phxskyharbor.com](http://phxskyharbor.com)

*A clean airport will help keep animals away from airplanes. That's safer for them and for us.*
